GITHUB: <https://github.com/gustavofantato> | **ADDRESS:** São Carlos SP
LANGUAGES: Portuguese (Native), English (B2) and Spanish (A2).

Undergraduate student in Information Systems at the Institute of Mathematics and Computer Sciences of the University of São Paulo (ICMC/USP) with a strong interest in software development and technology, especially back-end. I am a fast learner, have good communication skills, and have a strong interest in teamwork, always seeking professional growth and new challenges.

Experiences

Technology Associate Analyst | Monks Brasil
2025 Dec - 2026 Mar | Internship

- Worked in data automation for the Feed Monks product.
 - Responsible for responding to emails and implementing client requests, giving weekly feedback reports to the team leader regarding client relationships and results
 - Task management using Jira, following the Kanban methodology
 - The technologies used and learned were: Golang, XML files manipulation, Postman, Kubernetes

OOP Subject's Project - Java Café | 2026 | POS System

- Development of Java Café: a desktop Point of Sale (POS) system for order management, inventory control, and sales reporting, applying solid Object-Oriented Programming concepts.
- Responsible for the architecture in Java, and the creation of infrastructure services

Personal Project - BlackJack Web | 2026

- Development of a BlackJack game which is easily playable on a website. The game has a different feature, that is the dealer's playstyle: the user can choose if the bot plays aggressively (hits until get 19+ points), conservatively (stands on 15 points), or the cheater mode (it can see the next deck's card, deciding if wants to buy or not)
- The system has been constructed with different technical tools and concepts, as: OOP, a simple API (that links backend with the frontend), MySQL (to keep the user's money, associated with their nicknames)

Volunteer Teaching Assistant

- FREP (Educational Robotics Training) | 2026
 - Acted as a volunteer teaching assistant in the FREP project, focusing on teaching programming logic to public school teachers across Brazil.
- Introduction to Science Computer I | 1st Semester 2026
 - Focusing on programming logic using the C language. Directly assisted students during practical laboratory classes, clarifying doubts in exercise resolution and algorithm development.
- Student's Laboratory Assistance | 2026
 - Laboratory organization and technical support to students, assisting in the use of software, equipment, and basic maintenance.

Extracurricular Activities

- SEMCOMP (Computing week): worked on the infrastructure front, responsible for ensuring that everything is well organized and working
- CodeLab São Carlos Member: a group focused on the web/app's development, producing systems to the internal and external São Carlos's public. I am participating on intern projects which are built for the external public
- Hackathons (2025): participated in the Hackafools (organized by CodeLab) and Raia + .monks event

Education

Bachelor of Information Systems - Night
USP | ICMC (São Carlos, SP)
Jan. 2025 - Dec. 2028 Expected

English Course | Advanced
Your Access (São Bernardo do Campo, SP)
Jan. 2023 - Dez 2023

Skills & Tools

- **Languages & Frameworks:** C, Java, Spring (studying), SQL (studying)
- **Development Tools:** Git, GitHub, VS Code, IntelliJ, Linux (Ubuntu) / Mac OS, Postman
- **Concepts:** OOP, Data Structures, Algorithms (Big O), Scrum, Kanban, XP, Software Engineering, Computer Networks, LLM, AI
